

Md Shaqib Hussain

Data Engineer / Data Analyst / Data Scientist

Patna, India | 📞 +91-6203786026 | ✉️ mdshaqibhussain5@gmail.com | 🔗 linkedin.com/in/md-shaqib-hussain | 🐙 github.com/Shaqib27

SUMMARY

Data Analyst and aspiring Data Engineer with hands-on experience in data cleaning, exploratory data analysis (EDA), statistical modelling, ETL pipeline design, and building business intelligence dashboards to deliver actionable insights. Proficient in Python, SQL, Apache Spark, Apache Kafka, Airflow, and AWS. Experienced in machine learning model development (Scikit-learn, XGBoost, LightGBM), deep learning (TensorFlow, Keras), and Generative AI (LLMs, RAG). Holds a Post Graduate Diploma in Big Data Analytics (AI and ML) from CDAC with 86.88% and a B.Tech in Computer Science; GATE 2025 qualifier. Seeking opportunities in Data Engineering, Data Analytics, or Data Science roles where strong technical foundations and a problem-solving mindset can drive real business impact.

EDUCATION

Post Graduate Diploma in Big Data Analytics (AI and ML) <i>CDAC (Centre for Development of Advanced Computing), Pune</i>	Percentage: 86.88% <i>Aug 2025 – Feb 2026</i>
--	---

Bachelor of Technology in Computer Science and Engineering <i>Heritage Institute of Technology, Kolkata</i>	CGPA: 7.54 <i>Aug 2021 – Jun 2025</i>
---	---

SKILLS

Programming Languages: Python, SQL

Data Analysis and Statistics: Pandas, NumPy, statsmodels, Exploratory Data Analysis (EDA), Statistical Analysis, Hypothesis Testing, A/B Testing, Data Cleaning, Data Wrangling

Data Visualization and BI: Power BI, Tableau, Dashboard Design, KPI Reporting, Matplotlib, Seaborn

Machine Learning: Scikit-learn, Regression, Classification, Feature Engineering, Model Evaluation, Cross-Validation, Ensemble Learning (Random Forest, XGBoost, LightGBM)

Big Data and Processing: Apache Spark, PySpark, Hadoop, HDFS, Hive, MapReduce, Apache Kafka

ETL and Orchestration: Apache Airflow, ETL Pipeline Design, Data Ingestion, Data Transformation

Deep Learning and AI: CNNs, Transformer Models, TensorFlow, Keras

Generative AI: Large Language Models (LLMs), Prompt Engineering, Retrieval Augmented Generation (RAG)

Databases: MySQL, Data Warehousing, SQL Aggregations, Joins, Window Functions

Cloud and Platforms: Amazon Web Services (AWS) – EC2, S3; Linux

Backend and APIs: FastAPI, Streamlit

Tools: Git, GitHub, VS Code, JupyterLab, Microsoft Excel (Advanced), Docker

INTERNSHIP EXPERIENCE

Data Analyst Intern <i>The Developers Arena</i>	Feb 2026 – Apr 2026 <i>Pune, India</i>
---	--

- Cleaned and preprocessed 5+ datasets using Python (Pandas) and Excel, handling missing values and removing duplicates, improving overall data accuracy by an estimated 30%.
- Standardized and validated data formats across 3+ data sources to ensure consistency and improve data reliability for downstream analysis.
- Wrote 20+ SQL queries to extract, filter, and aggregate data from relational databases, reducing manual reporting time by approximately 40%.
- Built 3 interactive Power BI dashboards tracking key business KPIs, enabling faster decision-making for a team of 10+ stakeholders.
- Presented data-driven insights and actionable recommendations to the business team, directly supporting strategic decisions.

PROJECTS

Air Quality Forecasting System | *Python, PySpark, LightGBM, XGBoost, Airflow, Streamlit, AWS EC2* **Jan 2026**

- Performed end-to-end exploratory data analysis (EDA) on air quality datasets covering 5+ pollutant types, identifying seasonal trends and key AQI-driving correlations.
- Engineered time-series features and applied recursive forecasting logic with LightGBM and XGBoost; achieved R^2 of 0.89 and RMSE of 12.4, outperforming baseline by 22%.
- Designed and automated ETL workflows using Apache Airflow for scheduling and orchestrating data processing tasks, reducing manual intervention.
- Deployed an interactive Streamlit web application on AWS EC2 (Linux) enabling real-time AQI trend visualization and multi-hour predictions, used by 20+ test users during evaluation.

IntelliScan: AI-Assisted Cancer Screening System | *PySpark, TensorFlow, Keras, Hadoop, CNN* **Feb 2026**

- Designed a distributed preprocessing pipeline using PySpark and Hadoop to handle large-scale medical image metadata, reducing data preparation time by 45%.
- Built a CNN-based image classification model using TensorFlow and Keras for automated cancer detection and type classification, achieving 93% validation accuracy on a 50,000-image dataset.
- Implemented data augmentation strategies to address class imbalance, improving minority-class F1-score from 0.71 to 0.88.
- Optimized model performance through systematic hyperparameter tuning and 5-fold cross-validation, reducing overfitting by 20%.

Customer Behavior Analysis | *Python, SQL, Pandas, Power BI, Statistical Analysis* **May 2026**

- Built an end-to-end analytics pipeline covering data cleaning, SQL-based business analysis, and Power BI dashboarding for a retail dataset of 10,000+ records.
- Performed customer segmentation (RFM analysis) using SQL aggregations, joins, and window functions, identifying 3 high-value customer cohorts.
- Evaluated discount impact, subscription trends, and shipping preferences; found targeted discounts increased repeat purchase rate by 18% in the top customer segment.
- Delivered an interactive Power BI dashboard with 5 report pages tracking revenue, churn risk, and customer lifetime value for business stakeholder review.

CERTIFICATIONS AND ACADEMIC HIGHLIGHTS

CDAC PG Diploma in Big Data Analytics (AI and ML) – 86.88% **Feb 2026**

GATE 2025 – Computer Science and Engineering (Qualified) **Mar 2025**

Microsoft Excel: Basic to Advanced **2025**

EXTRACURRICULAR ACTIVITIES

National Service Scheme (NSS) **Aug 2021 – Jun 2025**

Coordinator – Heritage Institute of Technology, Kolkata

- Led campus and community awareness drives; coordinated educational support programs in local schools in Kolkata benefiting 100+ students.
